Welcome Message

Preparing Children for School: Looking Beyond the System

Dear Parents,

As children grow through their early years, many families begin to look ahead and think about the next step—school. It is a meaningful decision, often accompanied by many questions about different systems, expectations, and future pathways. Conversations frequently include comparisons between the **IB, British, American, and National systems**, each offering its own approach to learning.

While these systems do differ in structure and philosophy, what we have consistently observed is that children's success within any of them is not determined by the system alone, but by the **foundations they carry with them into school**.

Each system brings its own strengths. The IB approach encourages curiosity, inquiry, and independent thinking. The British system offers a clear and structured academic progression. The American system supports participation, flexibility, and communication, while the National system provides a more traditional framework with strong emphasis on knowledge and structure.

These differences are important, yet when children first enter school, they are all expected to manage similar experiences. They need to be able to sit within a group, follow instructions, communicate their needs, adapt to routines, and manage their emotions. These are not academic requirements—they are **developmental skills**, and they are built over time in the early years.

This is why the stage from ages 1 to 5 is so critical. During these years, children are learning how to function within a learning environment. They are practicing waiting, transitioning, expressing frustration appropriately, and becoming increasingly independent in their daily routines. These abilities form the foundation that allows children to access any curriculum with confidence.

Choosing the Right System for Your Child

With so many options available, it can feel overwhelming to decide which path is best. Rather than focusing only on the system itself, it can be helpful to take a step back and reflect on a few guiding questions.

Start by considering your child's **personality and learning style**. Some children thrive in structured environments with clear expectations, while others feel more comfortable in settings that encourage exploration and open-ended learning. There is no right or wrong—only what fits your child best.

It is also important to think about your **family values and long-term vision**. The system you choose should align not only with academic goals, but with the kind of learner and individual you hope your child will become. Whether you value independence, structure, creativity, or discipline, these priorities can guide your decision.

Consistency plays a significant role as well. Children benefit from stability, so choosing a system that your family can commit to over time can help avoid unnecessary transitions and support emotional security.

Finally, it is helpful to look beyond the system and consider the **school itself**. The environment, the quality of relationships, the approach of teachers, and the culture of the school often have a greater impact on a child's experience than the curriculum label alone.

The Role of Early Years in This Journey

No matter which system a child eventually joins, their ability to thrive will depend largely on the skills developed during their early years.

A child who can manage their emotions, adapt to change, communicate clearly, and show independence will find it easier to settle, engage, and succeed in any classroom. On the other hand, a child who is still developing these skills may find even the most supportive environment challenging.

This is why our shared focus—both at daycare and at home—is on building these essential foundations. Through consistent routines, guided interactions, and opportunities for independence, children gradually develop the confidence and self-regulation they need.

When parents and educators work together with a shared understanding, children experience a sense of stability that supports their growth in meaningful ways.

A Thought to Take Forward

Choosing a school system is an important decision, but it is only one part of a much bigger journey.

What truly prepares children for school is not the system they enter, but the **skills, confidence, and resilience they carry with them.**

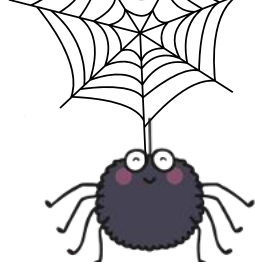

When we focus on nurturing these foundations in the early years, we give children something far more valuable than early academic knowledge—we give them the ability to learn, adapt, and succeed wherever they go.

With appreciation for your continued partnership,

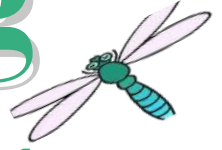

Lamia Hassanin

BUSY BUTTERFLIES

Teacher: Menna Ashraf

WHAT WE HAVE BEEN LEARNING

The Butterflies class has been happily exploring the beauty of the seasons as we moved into summer.

During our summer journey, the children learned about sunny weather and how the days become brighter and warmer. We explored delicious summer fruits like watermelon and enjoyed talking about refreshing drinks such as lemonade.

We also discussed what we wear in summer, like light and comfortable clothing, and talked about fun summer places such as the beach and the swimming pool. The children loved learning about the bright and cheerful colors of summer, which they explored through different creative activities.

Through fun and engaging experiences, the children enjoyed sensory play using water, sand, and simple juice activities, helping them explore the season in a hands-on way. They also developed their motor skills through outdoor play, running, and movement games.

In addition, the children practiced important social skills such as sharing, taking turns, and expressing their thoughts while playing and interacting with their friends. They were also introduced to simple vocabulary words like "sun," "hot," and "beach" in a fun and meaningful way.

BUSY BUTTERFLIES

Teacher: Menna Ashraf

WHAT WE HAVE BEEN LEARNING

We were very excited to celebrate Blue Day! It was a joyful day full of fun, messy, and playful activities. Our little ones looked wonderful in their blue outfits and had a great time participating in all the activities.

We also celebrated Spring with a special party, where the children enjoyed a fun garden egg hunt, sang cheerful songs, and shared lots of laughter and smiles. We were so happy to see their creative and adorable hats!

We are so proud of our little learners for their enthusiasm, participation, and the joy they bring every day. We can't wait to continue creating more beautiful memories full of fun, laughter, and happiness together.

BUSY BUTTERFLIES

Teacher: Menna Ashraf

UPCOMING THEME

We are excited to introduce our new topic: Transportation! During this unit, the children will explore different types of transportation and learn how people move from one place to another. We will talk about land transportation such as cars, buses, trucks, bicycles, and trains; air transportation like airplanes and helicopters; and water transportation such as boats and ships.

The children will learn about the purpose of each type of transportation, where it moves (on land, in the air, or on water), and how it helps us in our daily lives. We will also focus on simple and important vocabulary words such as:

"car," "bus," "train," "plane," "boat," "road," "sky," "sea," "fast," "slow," "stop," "go," "traffic light," "wheel," and "driver."

Through fun and engaging activities, the children will participate in:

- Role-playing (driver, passenger, pilot, captain)
- Building different vehicles using blocks and LEGO
- Creative art activities like drawing, coloring, and crafting simple vehicles
- Movement games to explore concepts such as fast/slow and stop/go
- Imitating the sounds of different transportation (cars, trains, airplanes)
- Playing with road tracks and toy cars
- Sensory activities using water (for boats) and sand (for roads)

The children will also be introduced to basic safety rules, such as crossing the road carefully and understanding traffic light colors (red, yellow, green).

This topic supports the development of motor skills through movement and play, enhances language skills by learning new vocabulary, and strengthens social skills such as sharing, cooperation, and taking turns during group activities.

WHAT WE HAVE BEEN LEARNING

Exploring Community & Emergency Vehicles!

This month, our Busy Bees continued their exciting journey into the world of transportation! We shifted our focus to community and emergency vehicles, helping the children understand how these vehicles play an important role in keeping everyone safe and connected.

Personal, Social & Emotional Development

Through our transportation theme, the Busy Bees have been learning an important life concept: the difference between things that belong to us and things that are shared. We explored this idea in a fun and relatable way—explaining that an ambulance, for example, belongs to everyone in the community, while some items (like our bags or toys from home) are personal and belong to us. This concept has been a little tricky to grasp, but with gentle reminders, role play, and lots of practice, we are confident the children will continue to grow in their understanding of sharing and ownership.

Physical Development

Our Busy Bees have been buzzing with activity as we strengthened our fine motor skills! A favorite spot this month has been the sandbox, where the children have enjoyed pouring, scooping, sifting, and creating imaginative masterpieces with sand.

Activity Highlight:

As part of our community vehicles topic, the children transformed into brave firefighters! Using spray bottles, they practiced their fine motor skills by “putting out fires,” all while engaging in imaginative and cooperative play. It was a big hit!

BUMBLE BEES

Teacher: Grace Muringani

WHAT WE HAVE BEEN LEARNING

Communication & Language

In communication and language, we have been encouraging the use of longer, more complex sentences to support listening and understanding.

For example, instructions like "Pack away the toys and then go and wash your hands" helped the children practice following multi-step directions and strengthen their comprehension skills. We have been so impressed with how well they are listening and responding!

Other News

Spring has officially sprung, and with it came lots of joyful celebrations!

We kicked off the month with Blue Day, a special day dedicated to celebrating uniqueness and individuality. We talked about how everyone is different and that is what makes us special! Even though the weather kept us indoors, it did not stop the fun. The children had a wonderful time celebrating together.

We also enjoyed a fantastic Spring Bonnet Day, full of color, creativity, and excitement as we welcomed the new season. To top it all off, the Easter Bunny paid us a visit! Each child received a special goody bag, and we hope they had lots of fun sharing their treats at home with their families.

BUMBLE BEES

Teacher: Grace Muringani

UPCOMING THEME

Next, we are diving into a brand-new adventure—"Under the Sea"! We cannot wait to explore the amazing world of ocean life and discover all the incredible sea creatures that live beneath the waves. They will learn about fish, dolphins, sharks, and turtles, finding out where they live in the sea and what they love to eat. They will also explore how these animals swim in the water and what fun colors they come in!

As we dive deeper, the children will see just how important the ocean is for all its sea creatures and learn that we need to keep it clean and safe for them. They will talk about the sun shining on the water and how the ocean changes at different times of the day, sparkling under the sunlight or calming down in the evening. To help with their learning, they will sort sea animals by size, like big sharks and tiny fish, and have fun counting fish and seashells. It is going to be an exciting journey under the sea, full of discovery, fun, and imagination!

PLAYLIST

LADYBIRDS

Teacher: Nahla Hassan

WHAT WE HAVE BEEN LEARNING

Last month we wrapped up our Animal Kingdom adventure with hands-on fun across three mini-topics. In Life Under the Sea, we made sea turtle crafts and fish handprint art while learning how ocean animals move and breathe. For Arctic Explorers, we compared hot vs. cold climates and used a puppet to lead "Baby Shark" - keeping everyone engaged with rhythm as we practiced the family sequence. We ended with Dinosaurs, where we created sunset dinosaur silhouettes with watercolor washes and black cutouts, built our own dinosaurs, and made handprint dinos while learning about herbivores, carnivores, and digging for "fossils"

Throughout this theme, children will build friendships by sharing experiences, use longer sentences to describe their ideas, explore rhythm and rhyme, and strengthen fine motor skills through painting, pouring, and crafting. We'll also talk about emotions, safety, and how to help our friends.

LADYBIRDS

Teacher: Nahla Hassan

UPCOMING THEME

As we wrap up a wonderful year together, our final theme will explore the magic of the seasons. Children will learn how weather, clothes, and nature change throughout the year through play, art, and hands-on discovery. We will begin by introducing spring, summer, fall, and winter with a Four Seasons Wheel Painting activity and by taking turns being our class "meteorologists" during Weather Report time.

We will then take a quick trip back to fall and winter. Children will race leaves with straws to explore fast and slow, create Snowman Feelings Drawings to talk about emotions, and enjoy Magic Snow sensory play.

As spring arrives in our classroom, we will watch rain form in our Rain Cloud Experiment, stamp Sponge-Painted Butterflies, and add Fingerprint "blossoms" to spring trees.

To celebrate summer, we will create "Squish Painting" suns and bright Sun-catchers for our windows, practice packing a beach bag with summer clothes, and dig in kinetic sand with shells, shovels, and small buckets.

How You Can Support :

Talk about the weather each day and help your child choose clothes for sun, rain, or wind. Point out signs of the current season on walks - blooming flowers, falling leaves, or hot sun. Read books about seasons together and sing favorite weather or seasonal songs. Encourage your child to describe what they see using longer sentences like "The clouds are big and gray because it might rain." For fine motor practice, let them help with pouring drinks, stirring, or using tongs at snack time.

SPINNING SPIDERS

Teacher: Reem Taha

WHAT WE HAVE BEEN LEARNING

During our previous theme, Dinosaurs, children explored the exciting world of prehistoric animals through play, stories, and discovery activities. They learned about different dinosaurs, their sizes, movements, and facts about them while developing new vocabulary as they learned their names and recognized different aspects about them. Through creative art, small world play, movement activities, and early science exploration, children strengthened their communication skills, imagination, cooperation, and early counting and phonics knowledge while sharing ideas and learning together. ndly day filled with beautiful moments.

SPINNING SPIDERS

Teacher: Reem Taha

UPCOMING THEME

We are excited to introduce our new theme, **Animal Kingdom**, where children will explore the amazing world of animals through play, investigation, stories, and creative experiences.

Over the coming weeks, children will learn about different animals, their habitats, sounds, movements, and how they grow and survive. We will explore in the first week the habitats of popular animals, then we will focus on arctic animals and rainforest animals, while encouraging curiosity and respect for living things. Through stories, role play, music, art, discovery activities, and outdoor learning, children will explore the Animal Kingdom while developing a wide range of skills. They will learn to name and describe different animals and their habitats, strengthen speaking and listening skills through discussions and storytelling, and practise early phonics by recognising letter sounds and linking them to animal names. Children will also build early mathematics skills by counting, comparing groups, and matching numbers to quantities. Physical development will be supported as children move like animals and develop control through drawing and mark making, while social skills will continue to grow through sharing, cooperation, and learning how to care for animals and their friends.

SPINNING SPIDERS

Teacher: Reem Taha

UPCOMING THEME

Through play-based learning, children will take part in a variety of exciting activities that support their curiosity and imagination. They will enjoy role play in a vet clinic and animal rescue centre, build animal homes in the construction area, and create animal-inspired art and crafts. Children will explore different animal textures, footprints, and habitats through hands-on discovery activities, sing animal songs, and move creatively to music. Outdoor learning will include safari hunts and fun animal movement games, encouraging active learning while developing confidence and teamwork skills.

How You Can Support at Home

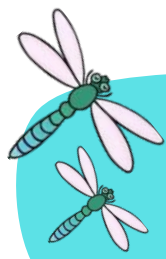

- Talk about animals you see in books, parks, or on walks
- Read animal stories together and discuss favourite animals
- Practise letter sounds and listen for sounds at the beginning of words
- Count toys, steps, or snacks together during daily routines
- Encourage your child to talk about their feelings and experiences

We look forward to a wonderful learning journey exploring the Animal Kingdom together!

DREAMY DRAGONFLIES

Teacher: Nourhan Youssef

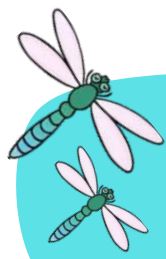

WHAT WE HAVE BEEN LEARNING

What we've been learning: This month, the Dragonflies continued exploring the Garden theme, with a strong focus on applying what they have learned about the life cycle of a seed, the parts of a plant, and the role of each part. The children developed their understanding that each part of the plant has an important job, and explored what plants need to grow, such as sunlight, water, and air.

The children engaged in hands-on experiences by planting seeds, vegetables, chia seeds, and other plants based on their own choices. They observed the growth process over time and developed a better understanding of how to care for living things.

The children also explored spring weather, learning how flowers bloom and how the environment becomes more colorful and lively during this season. They enjoyed discussing the changes they could see around them and connecting this to their own experiences.

DREAMY DRAGONFLIES

Teacher: Nourhan Youssef

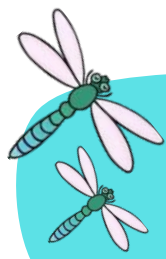

WHAT WE HAVE BEEN LEARNING

Throughout the month, the children participated in several special events. They took part in an Easter Parade and Egg Hunt, where they designed and created their own Easter hats, showing creativity and enthusiasm. In addition, we celebrated Blue Day, where the children engaged in a variety of sensory and messy play activities using the color blue. This experience supported an inclusive environment, allowing all children to explore materials in their own way and at their own pace, while encouraging sharing, cooperation, and respect for others.

In literacy, the children practiced writing their own names and began developing confidence in early writing. We focused on the letters h and r, exploring their sounds and identifying words that begin with these letters. The children also practiced copying these letters on the whiteboard, supporting their letter formation and recognition skills.

In mathematics, the children practiced recognizing the numbers 8 and 9, and developed their counting skills by counting from 1 to 9. They also explored ordering objects by weight, helping them understand basic mathematical concepts such as heavier and lighter through practical, hands-on activities.

DREAMY DRAGONFLIES

Teacher: Nourhan Youssef

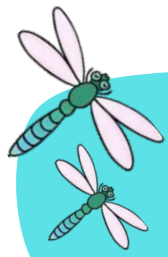

UPCOMING THEME

The Dragonflies will begin an exciting new theme: Outer Space. The children will explore the planets, learning their names and simple facts about each one, such as whether they are hot or cold, dark or bright. They will also begin to understand that the planets revolve around the sun and will learn more about our own planet, Earth.

Throughout the theme, the children will learn about the sun and the moon, and explore the difference between day and night. They will discuss why it gets dark, understand that the sun gives us light and heat, and learn that the moon appears at night. The children will also talk about things they can see in the sky, such as stars, and begin to develop their observation skills.

In addition, the children will explore simple mathematical concepts by sorting planets based on size, such as big and small. They will also learn about astronauts and how they travel to space, helping to develop their curiosity and imagination.

ماذا تعلمنا

خلال هذا الشهر، تعرّف الأطفال على موضوع المهن ووسائل المواصلات وحيوانات المزرعة من خلال أنشطة ممتعة ومليئة باللعب والتعلّم. تعرّف الأطفال على بعض المهن المهمة مثل

الطبيب 🩺👨

المعلم 📖👨

الشرطي 🚔👮

رجل الإطفاء 🚒👨

الطاهي 👨🍳، وتعلّموا كيف يساعدنا كل شخص في حياتنا اليومية. كما استمتعوا بتمثيل بعض المهن من خلال اللعب التخيلي والأنشطة الجماعية، وتعلّموا أيضا من خلال لعبة توصيل المهن بأماكن العمل مثل توصيل الطبيب بالمستشفى، والمعلم بالمدرسة، والطاهي بالمطبخ، ورجل الإطفاء بمركز الإطفاء.

كما استكشف الأطفال وسائل المواصلات المختلفة مثل السيارة 🚗، الحافلة 🚌، القطار 🚂، الطائرة ✈️، والدراجة 🚲، وتعلّموا أسماءها وكيف نستخدمها للذهاب إلى المدرسة أو السفر أو زيارة الأماكن المختلفة.

وفي موضوع حيوانات المزرعة، تعرّف الأطفال على البقرة 🐄، الدجاجة 🐔، الخروف 🐑، الحصان 🐎، الماعز 🐐، والبط 🦆، وتعلّموا أصواتها وفوائدها مثل الحليب 🥛، البيض 🥚، والصوف 🧶.

من خلال التلوين، والقصص، والأغاني، وألعاب المطابقة، والأنشطة الحركية، استمتع الأطفال بتعلّم كلمات جديدة مثل: طبيب، سيارة، بقرة، قطار، بيض، مدرسة، مزرعة، طائرة، مما ساعدهم على تنمية لغتهم وفهمهم للعالم من حولهم بطريقة بسيطة ومحبة لهم.
