Welcome Message

Embracing Change: Supporting Children Through Transitions

Dear Parents,

As we approach the end of another wonderful year, our thoughts naturally turn toward what comes next. For some children, this means moving to a new classroom. For others, it may mean attending summer camp, starting school, or adapting to new routines and environments. While these changes are exciting milestones, they can also bring uncertainty and big emotions for both children and adults.

Transitions are an important part of life. They teach children how to adapt, build resilience, and develop confidence in unfamiliar situations. However, successful transitions are rarely the result of chance. They are the outcome of thoughtful preparation, supportive relationships, and strong partnerships between families and educators.

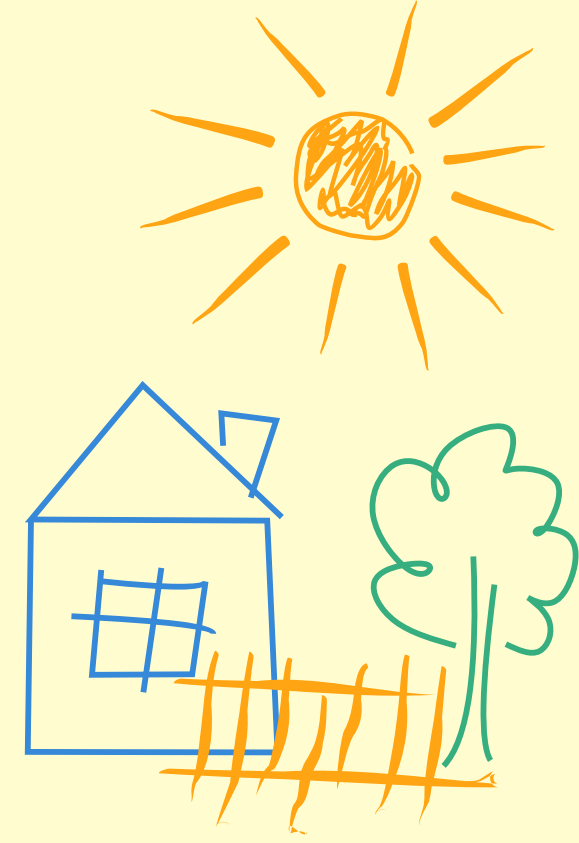

During the early years, there are three key areas that play a particularly important role in helping children navigate change successfully: **independence, communication, and emotional regulation.**

Building Independence

Children who are encouraged to do things for themselves often find transitions easier to manage. Independence is not about expecting children to do everything alone; rather, it is about helping them develop confidence in their own abilities.

Simple skills such as putting on shoes, washing hands, managing personal belongings, feeding themselves, following routines, and making age-appropriate choices all contribute to a child's sense of competence. When children believe "I can do it," they approach new environments with greater confidence and less anxiety.

As educators, we intentionally create opportunities for children to practice these skills throughout the day. At home, parents can support this development by allowing children extra time to complete tasks independently, even when it may be quicker to do it for them.

Encouraging Expressive Language

Transitions often bring questions, worries, and excitement. Children who can communicate their thoughts and feelings are better equipped to seek support when they need it.

Expressive language is much more than vocabulary. It includes the ability to ask for help, describe feelings, express preferences, solve simple social problems, and communicate needs clearly.

Whether a child is telling a teacher they miss their parent, asking a friend to play, or explaining that they feel nervous about a new classroom, communication becomes a powerful tool for coping with change.

Parents and teachers can support expressive language by encouraging conversations, listening attentively, naming emotions, and creating opportunities for children to share their experiences and ideas.

Supporting Emotional Regulation and Secure Attachment

Perhaps the most important foundation for successful transitions is emotional security.

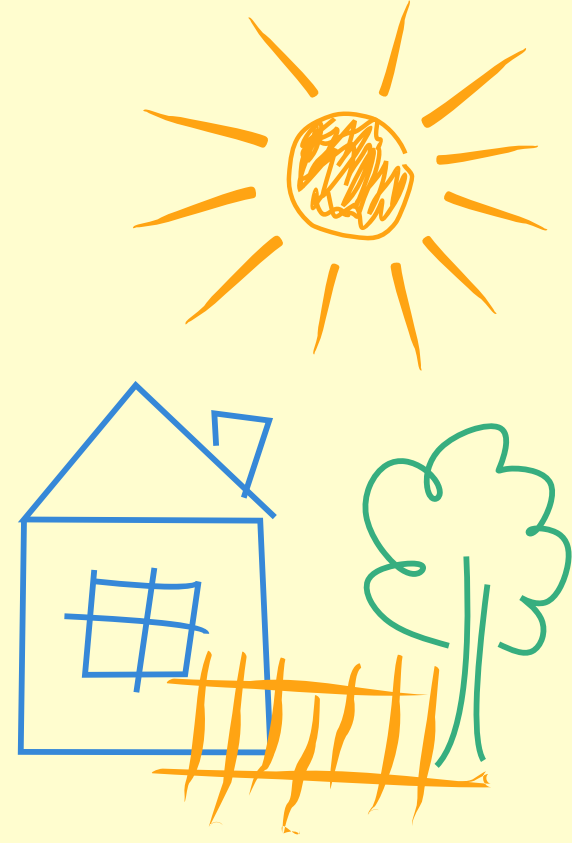

Children experience change differently from adults. What may seem like a small adjustment to us can feel significant to them. A new classroom, a different teacher, or a change in routine may trigger feelings of excitement, uncertainty, sadness, or even frustration.

This is where emotional regulation begins. Young children are not born knowing how to manage these feelings; they learn through co-regulation with trusted adults.

When we acknowledge children's emotions, remain calm during difficult moments, and provide reassurance, we help them develop the skills needed to regulate themselves over time.

Equally important is attachment. Children transition most successfully when they feel securely connected to the adults caring for them. Strong relationships provide children with a "safe base" from which they can explore new environments confidently.

As parents, it is natural to feel emotional during times of transition as well. Children are highly attuned to our feelings. When we approach changes with confidence, optimism, and trust, we help communicate to children that new experiences can be positive and manageable.

Working Together

Successful transitions are strongest when families and educators work as partners. By sharing information, maintaining consistent expectations, and communicating openly about children's needs, we create continuity between home and school.

Over the coming weeks, you may notice your child asking more questions, seeking reassurance, or showing mixed emotions about upcoming changes. These reactions are normal and expected. Our role is not to eliminate these feelings but to help children understand and manage them.

As we prepare our children for their next adventure, let us remember that readiness is not simply about academic knowledge. It is about confidence, communication, resilience, and the ability to form positive relationships with others.

Together, we can help our children view transitions not as something to fear, but as opportunities to grow, learn, and thrive.

With gratitude for your partnership throughout the year,

Lamia Hassanin
Daycare Principal

PARENT TIP BOX

5 WAYS

to Prepare Your Child for a New School or Summer Camp

Transitions can feel exciting, overwhelming, and sometimes a little scary for young children. Here are five simple ways you can help your child feel confident and secure as they prepare for their next adventure.

1

Talk About the Change Positively

Speak about the new classroom, school, or camp with enthusiasm and confidence. Children often take emotional cues from the adults around them. A positive and reassuring tone helps children view the transition as an exciting opportunity rather than something to fear.

2

Encourage Independence in Daily Routines

Give your child opportunities to practice age-appropriate self-help skills such as washing hands, putting on shoes, carrying their belongings, tidying up after themselves, and eating independently. These small successes build confidence and reduce anxiety in new environments.

3

Help Your Child Name Their Feelings

Children may experience excitement, nervousness, sadness, or uncertainty about upcoming changes. Encourage conversations about feelings and reassure them that all emotions are welcome. Phrases such as "It sounds like you're feeling a little nervous about meeting new friends" help children feel understood and supported.

4

Practice Listening and Following Routines

Simple daily routines help children feel secure. Encourage your child to follow one- and two-step instructions, participate in family routines, and practice transitioning between activities. Predictability builds confidence and supports successful adjustment to new settings.

5

Keep Goodbyes Short, Calm, and Consistent

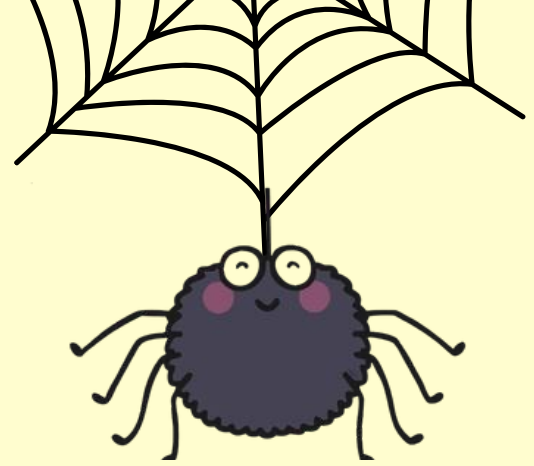

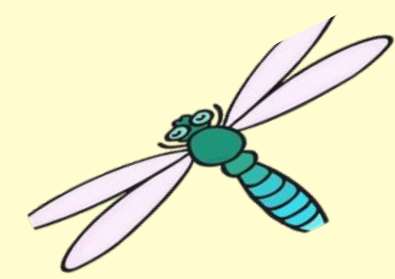

When the time comes, create a simple goodbye routine and stick to it. A warm hug, a reassuring phrase, and a confident farewell communicate trust and security. Long or emotional goodbyes can sometimes increase children's anxiety rather than ease it.

REMEMBER

Children do not need to feel completely fearless to be ready for a transition. Readiness means having supportive adults who help them navigate new experiences with confidence, resilience, and trust in themselves.

Up-coming Events

Thursday, 18th June

Islamic New Year- **Daycare Closed**

Sunday, 21th June

Bees Class - **Graduation Party**

Monday, 22th June

Spiders Class - **Graduation Party**

BUSY BUTTERFLIES

Teacher: Menna Ashraf

WHAT WE HAVE BEEN LEARNING

Over the past weeks, the children enjoyed learning about Land Transportation 🚗 🚦

We explored different vehicles such as cars, buses, trucks, bicycles, and trains, and talked about how they help us move from one place to another. The children also enjoyed many fun activities related to roads, traffic lights, and vehicle sounds.

Now, we are excited to move to our new part of the topic: "Water Transportation" 🚢 🌊

The children will learn about different types of transportation that move on water, such as:

Boats

Ships

Small water vehicles

We will talk about where they move, how they work, and why people use them.

During this topic, the children will enjoy different fun and hands-on activities, including:

✨ Water sensory play with boats

✨ Building boats using blocks and different materials

✨ Art and craft activities related to water transportation

✨ Singing songs and listening to transportation sounds

✨ Role play activities like captain and passenger

✨ Exploring floating and sinking through simple activities

We will also continue practicing simple vocabulary words such as:

boat, ship, water, sea, fast, slow, stop, go, captain, and sail.

BUSY BUTTERFLIES

Teacher: Menna Ashraf

WHAT WE HAVE BEEN LEARNING

After Eid Al-Adha holiday, we will continue our Transportation topic by exploring "Air Transportation" ✈️☁️

The children will learn about airplanes, helicopters, and how people travel through the sky.

This topic helps support the children's language, imagination, social interaction, and fine and gross motor skills through play and exploration.

We are excited to continue this learning journey together!

UPCOMING THEME

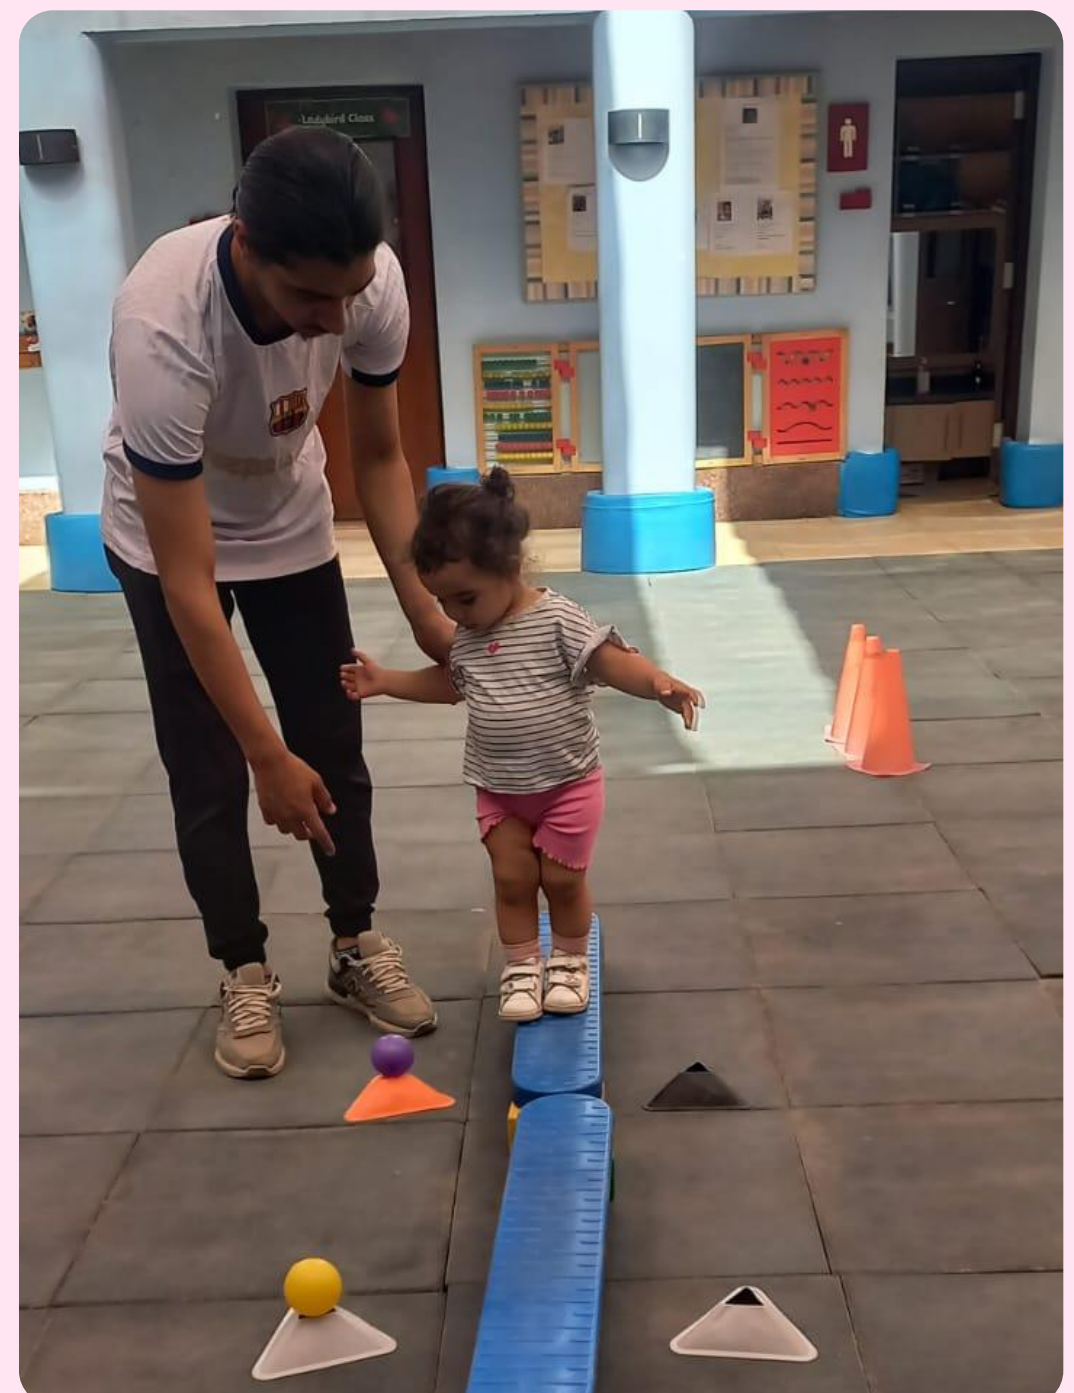

This will be the last topic we explore together this year 💛

We are so proud of all the children and how much they have learned, explored, and grown throughout the year. It has been a wonderful journey full of learning, play, creativity, and happy memories together.

After finishing our Transportation topic, we will be getting ready for our End of Year Party 🎉🌟

We are excited to celebrate all the children's hard work, progress, and beautiful moments they shared with us during the year.

Thank you for your continuous support and cooperation throughout this amazing year

BUSY BUTTERFLIES

Teacher: Menna Ashraf

UPCOMING THEME

The Butterflies class has been happily exploring the beauty of the seasons as we moved into summer.

During our summer journey, the children learned about sunny weather and how the days become brighter and warmer. We explored delicious summer fruits like watermelon and enjoyed talking about refreshing drinks such as lemonade.

We also discussed what we wear in summer, like light and comfortable clothing, and talked about fun summer places such as the beach and the swimming pool. The children loved learning about the bright and cheerful colors of summer, which they explored.

BUMBLE BEES

Teacher: Grace Muringani

WHAT WE HAVE BEEN LEARNING

This month, the buzzing bees have been busy exploring an exciting "Under the Sea" theme. The children were introduced to different sea animals and learned about the wonderful creatures that live in the ocean. We talked about the seahorse being small and gentle, the starfish looking just like a bright star, and the jellyfish being soft and wobbly as it floats through the water. The children were also fascinated by the octopus and its eight long arms that help it swim and catch food.

We also explored how sea animals move and behave in the ocean. The children learned that sharks are very fast swimmers, while turtles move slowly and calmly through the sea. Through songs, stories, and fun activities, the buzzing bees enjoyed discovering ocean life and learning new words to describe the amazing animals under the sea.

In Personal, Social and Emotional Development, we learnt about caring for others and showing kindness to our friends and family. The children practised understanding how other people may feel and learned to show love and concern for people who are special to them. We reinforced the importance of saying sorry when we make mistakes and showing remorse by using kind actions and gentle words. The children also learned to share toys, help their friends, and comfort others when they are sad or upset. Through stories, role play, and group activities, they practised being kind, caring, and respectful to everyone around them.

BUMBLE BEES

Teacher: Grace Muringani

WHAT WE HAVE BEEN LEARNING

In Communication and Language, we continued to develop our language skills by helping the children understand and answer simple "who," "what," and "where" questions. In some circle time sessions, the children confidently answered questions like "What is this?", "Where are the toys?", and "Who is not here today?" The children enjoyed looking around the classroom, identifying objects, and talking about their friends and daily routines. Also during story time, the children answered questions such as "Who is in the story?", "What is the boy holding?", and "Where is the fish swimming?" This helped them reinforce their understanding of simple question words and encouraged them to listen carefully and respond using clear words and short sentences.

BUMBLE BEES

Teacher: Grace Muringani

UPCOMING THEME

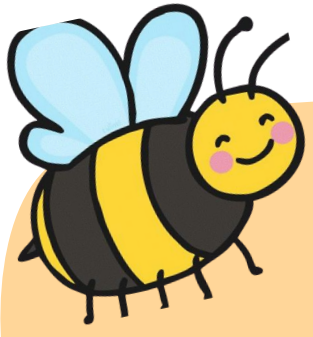

I cannot believe this will be our last full month together before the summer camps begin -where has all the time gone? It has been such a wonderful journey watching the children learn, grow, and create so many special memories together.

We will continue with our exciting "Under the Sea" theme, where we will focus on learning how to protect the sea and care for ocean animals. The children will explore why it is important to keep the oceans clean and how rubbish and pollution can harm sea creatures.

We will also be busy perfecting our artwork, decorating our classroom, and getting everything ready for our exciting end-of-year celebrations. The children will enjoy taking part in creative activities as they make colourful displays and special crafts to brighten our classroom and celebrate all the wonderful learning that has taken place throughout the year. There is so much excitement building as we prepare for this special occasion together.

Please keep an eye on your inboxes, as our special invitations and more details about the celebrations will be coming soon!

LADYBIRDS

Teacher: Nahla Hassan

WHAT WE HAVE BEEN LEARNING

As we close out a wonderful year together, we're spending this month fully immersed in summer, the final stop on our Four Seasons journey. After exploring fall, winter, and spring, the children are now making connections between all four seasons and celebrating what makes summer special.

Activity Highlight:

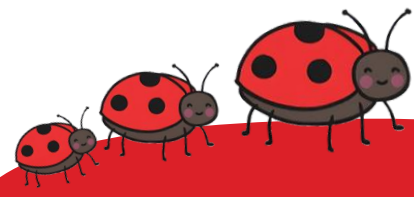

Communication and Language: Using longer sentences to describe weather and changes: "The leaves are orange because it's fall."

Knowing the world: Noticing patterns, making predictions, and comparing hot/cold, wet/dry

Social-Emotional: Connecting weather to feelings and learning to help friends in any season

Physical development: Painting, pouring, stamping, tearing, and threading through seasonal crafts

LADYBIRDS

Teacher: Nahla Hassan

UPCOMING THEME

We're finishing our seasons journey with a splash into summer, and getting ready for our big end-of-year celebration "Treasure Island"

Our activities will include:

Squish-painting suns and making bright sun-catchers to explore light and shadows.

Packing pretend beach bags and sorting summer clothes, hats, and sunglasses.

Digging in kinetic sand with shells, shovels, and buckets while we talk about vacations.

Splash days with pouring, measuring, and floating/sinking to build coordination.

Continuing as class "meteorologists" to track hot sunny days and sun safety.

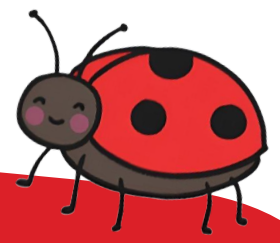

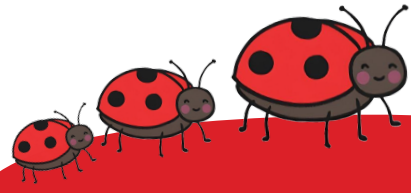

As our End-of-Year Party is approaching, the Ladybirds are busy getting ready:

Song Practice: Rehearsing "Over the Deep Blue Sea" with actions, and "The More We Get Together".

Decoration Crew: Children are making palm trees, treasure maps, paper parrots, and some beach friends to transform our classroom into an enchanting treasure island.

Friendship Treasure: Talking about the "treasures" we've found this year — our friends, new skills, and favorite memories.

SPINNING SPIDERS

Teacher: Reem Taha

WHAT WE HAVE BEEN LEARNING

Our amazing Spinning Spiders have been very busy exploring the fascinating world of Arctic animals through a variety of interactive, hands-on, and playful learning experiences. The children learned to identify many Arctic animals, including the polar bear, snowy owl, walrus, seal, Arctic fox, Arctic hare, and different kinds of whales. They discovered interesting facts about these animals, where they live, and how they survive in the cold weather surrounded by ice and snow.

Through sensory and water play, the children especially enjoyed exploring penguins and icebergs in the water tray, using their imagination to create their own Arctic adventures. In art and craft activities, they created wonderful pieces of work that helped us build a beautiful classroom display board showcasing their learning and creativity. The children also had lots of fun taking part in messy play activities during our Earth Day celebrations, where they explored natural materials and learned simple ways to care for our planet while enjoying sensory exploration and teamwork with their friends.

SPINNING SPIDERS

Teacher: Reem Taha

UPCOMING THEME

We are going to continue learning about animals, with a focus on rainforest animals like guerilla, monkeys, tucan, tiger, sloth, parrots, frog, insects and more. They will enjoy different activities to turn the class into a forest and get ready for the end-of-year party. They will learn to name and describe different animals and their habitats, strengthen speaking and listening skills through discussions and storytelling, and practise early phonics by recognising letter sounds and linking them to animal names. Children will also build early mathematics skills by counting, comparing groups, and matching numbers to quantities. Physical development will be supported as children move like animals and develop control through drawing and mark making, while social skills will continue to grow through sharing, cooperation, and learning how to care for animals and their friends.

Through play-based learning, children will take part in a variety of exciting activities that support their curiosity and imagination. They will enjoy role play in a vet clinic and animal rescue centre, build animal homes in the construction area, and create animal-inspired art and crafts. Children will explore different animal textures, footprints, and habitats through hands-on discovery activities, sing animal songs, and move creatively to music. Outdoor learning will include safari hunts and fun animal movement games, encouraging active learning while developing confidence and teamwork skills. Alongside training on our performance for this year, we are saying goodbye to this wonderful year.

SPINNING SPIDERS

Teacher: Reem Taha

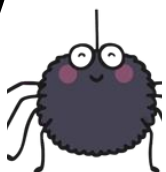

HOW YOU CAN SUPPORT AT HOME

- Talk about animals you see in books, parks, or on walks
- Read animal stories together and discuss favourite animals
- Practise letter sounds and listen for sounds at the beginning of words
- Count toys, steps, or snacks together during daily routines
- Encourage your child to talk about their feelings and experiences

We look forward to a wonderful learning journey exploring the Animal Kingdom together!

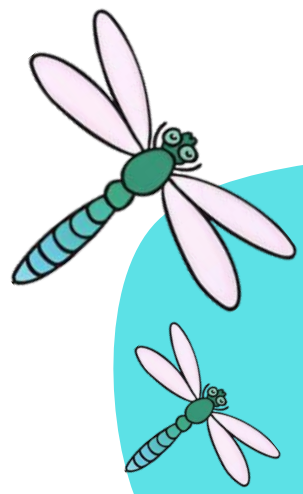

PLAYLIST

[Down In The Jungle - KIDDY MUSIC](#)

DREAMY DRAGONFLIES

Teacher: Nourhan Youssef

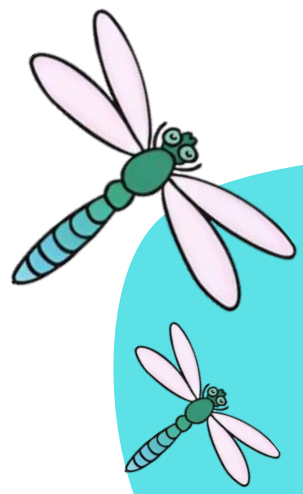

WHAT WE HAVE BEEN LEARNING

This month, the Dragonflies explored the exciting theme of Outer Space. The children learned about the planets, their names, and simple facts about each one. They discussed whether planets are hot or cold, bright or dark, and discovered interesting facts such as Mars being known for its dusty red surface. The children also learned that there are eight planets that revolve around the sun and were introduced to the idea that Pluto is now known as a dwarf planet because it is smaller and different from the other planets.

Throughout the month, the children developed their understanding of the sun and the moon and explored the difference between day and night. They discussed why it becomes dark at night, learned that the sun gives us light and heat, and understood that the moon appears in the night sky. The children also talked about things they can see in the sky, such as stars, helping to strengthen their observation and communication skills. The children showed great curiosity while learning about astronauts and how they travel to space. They enjoyed imaginative discussions and activities related to space travel, which supported their creativity and understanding of the world around them.

In mathematics, the children explored mathematical concepts by sorting planets according to their size, such as big and small. We also revised numbers from 1 to 5 through counting activities, comparing quantities, and number recognition games. In addition, the children revised familiar shapes such as circles and triangles through practical and interactive activities.

In literacy, we focused on the letters G and M, exploring their sounds and identifying words that begin with these letters. The children practiced recognizing and copying the letters on the whiteboard, supporting their letter formation, phonics awareness, and early writing skills.

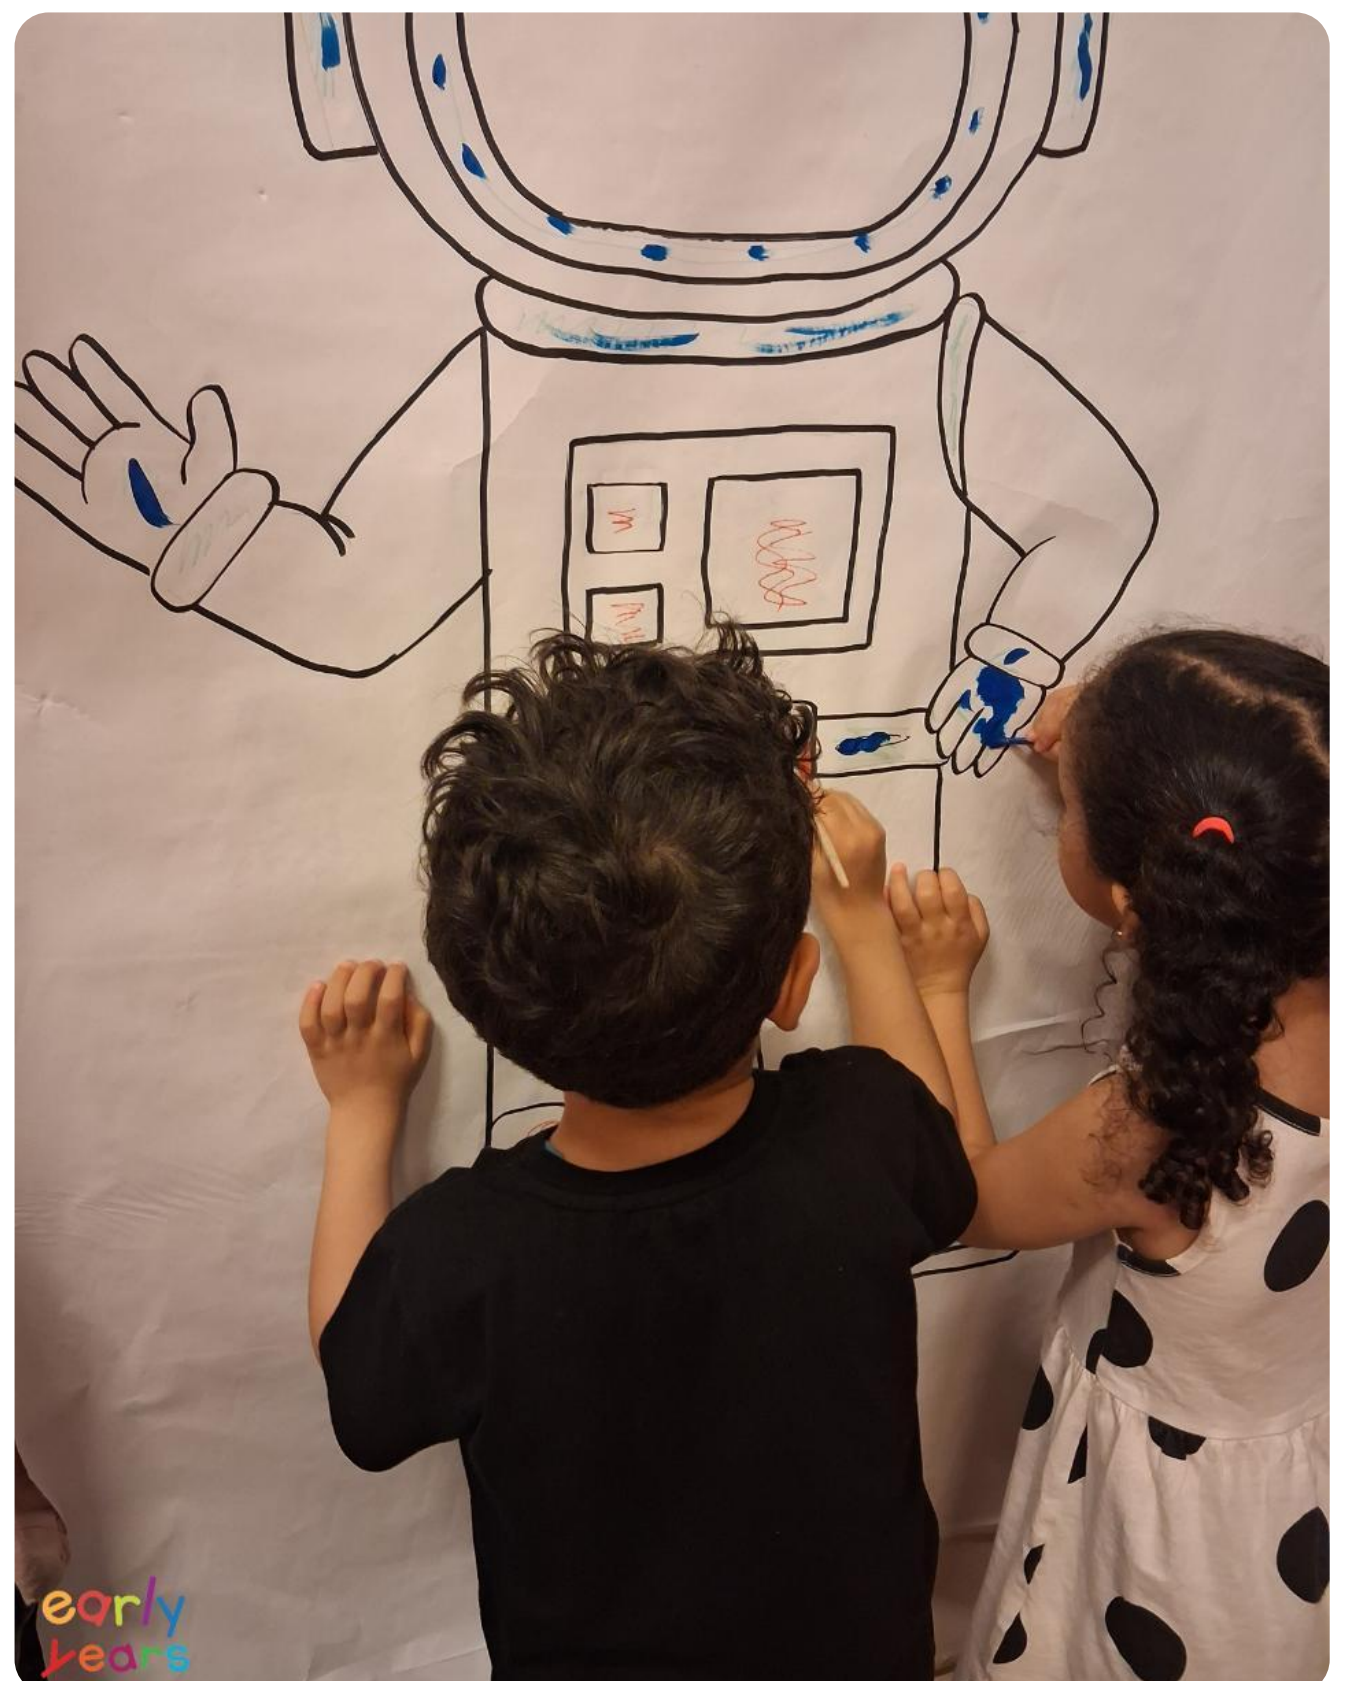

DREAMY DRAGONFLIES

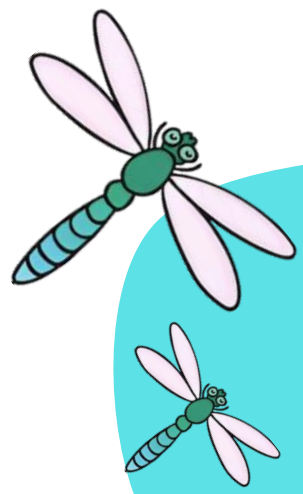

Teacher: Nourhan Youssef

UPCOMING THEME

Next month, the Dragonflies will continue exploring the exciting theme of Outer Space. The children will build on their previous learning by revisiting the planets, the sun, the moon, stars, and space travel through a variety of creative and hands-on activities. They will continue developing their understanding of space while strengthening their communication, observation, and imaginative thinking skills.

Alongside the theme, the children will begin preparing for the End of Year Performance. They will take part in rehearsals, practice songs and movements, and build confidence while performing in front of others. These experiences will support children's listening and attention skills, cooperation, self-expression, and confidence. The children are very excited to practice together and prepare for this special celebration of their learning and achievements throughout the year.

ماذا تعلمنا

خلال هذا الشهر، استمتع الأطفال بالتعرف على عالم المهن المختلفة وأهميتها في حياتنا اليومية. و تعريف المهنة هي العمل الذي يقوم به الشخص لمساعدة الناس وكسب المال. وتعرفنا على الدور الذي يقوم به كل شخص لخدمة المجتمع.

هناك مهن كثيرة ومهمة في حياتنا، مثل:

- الطبيب يعالج المرضى.
- المعلم يعلم الأطفال.
- الشرطي يحافظ على الأمن.
- رجل الإطفاء يطفئ الحرائق.
- المزارع يزرع الخضروات والفواكه.

و كل مهنة مهمة ولها دور في المجتمع، وعلينا احترام جميع المهن.

كما استكشفنا الأماكن المرتبطة بكل مهنة، مثل المستشفى، والمدرسة، ومحطة الإطفاء، والمزرعة، وتعرفنا على الأدوات والأشياء المستخدمة في كل مكان وكيف تساعد أصحاب المهن على أداء أعمالهم. وقد ساهمت هذه الأنشطة في تنمية معرفة الأطفال بالعالم من حولهم، وتعزيز تقديرهم واحترامهم لمختلف المهن وأصحابها.

كان شهرًا مليئًا بالاكتشاف والتعلم من خلال المناقشات والأنشطة التفاعلية التي أثارت فضول الأطفال و شجعتهم على التعرف على المجتمع وأفراده بطريقة ممتعة وهادفة. ✨
